

4/27/2022

Laguna Clay has been dedicated to bringing a full portfolio of products at the most reasonable costs. However, as stated back in March, we continue to face inflationary pressures, historically high freight rates and delays through supply chain issues. We have made the difficult decision to implement price increases on all Laguna products.

Today we are sharing with you our WHEEL price increase for 2022.

GT400's and GT800's will increase 10% and the Lockerbie kick wheels will be increased 15%.

This price increase will go into effect on Monday May 23rd. Existing PO's and PO's received and dated before May 23rd will be honored at the current price.

A sincere thank you for your understanding of the issues facing us in this current environment. Glazes and Refractory price increases will follow at a later date.

Sincerely,

Laguna Clay Company
